Silverstone Park Schools Programme

- **STEM Career Inspiration:** Students explore future pathways through workshops and business visits with local employers.
- **Industry Collaboration:** Students connect with professionals from companies such as Ducati, Dumarey and the DMC.
- **Hands-On Learning:** Students take part in tours and activities to experience engineering, technology and precision manufacturing first-hand.
- **Expanding Opportunities:** Plans are underway to open the programme to primary and sixth form students from 2026/27.
- **Pathways to Work:** A potential shared-business apprenticeship scheme is being explored to support young people into local careers.

WIN

Women's Innovation Network

- Women make up only **16%** of the UK engineering workforce, and **75%*** of Silverstone Park's community is male — showing the scale of the gap.
- The **Women's Innovation Network (WIN)** is growing fast, with high-profile events at Silverstone Circuit and its next event in collaboration with the F1 Academy
- **More women in leadership = better business:** stronger performance, innovation, and resilience.
